

INTEGRATED QUALITY, ENVIRONMENT, SAFETY AND HEALTH POLICY

LOTRANS PORTES, SL is a family business, whose activity is the transport of goods by national and international road, and logistics. We have modern and advanced fleets that allow the optimal **transport** of any type of **merchandise**, selecting the best to the alternative from an integral point of view. We manage transport by selecting collaborations with proximity criteria according to the principles of circular economy.

TSP in its eagerness to become an Integral Logistics Operator expands its Instalaciones (m² available), Computer Systems, Suppliers and Personnel, giving relevance to all these interested parties, without forgetting the Social and Environmental commitments. We lead R&D&I projects based on the future principles of the logistics: sustainability, digitalization and efficiency of information in real time.

THE MANAGEMENT of the company has as its primary objective, to achieve the full satisfaction of our customers, internal and external, meeting their expectations. And it expressly expresses its concern for the prevention of accidents at work and occupational diseases. Developing a business activity of respect for the Environment, and continuous improvement.

✓ You agree to:

1. Comply with the provisions of current legislation applicable to our activity, in matters of Environment, and Health and Safety. As well as, other voluntary commitments subscribed.
2. **Protect the environment**, minimizing the real or potential impact of the activity, avoid accidents and occupational diseases, improving safety conditions in the company. In particular, to adopt the measures that fall within its competences, to contribute to the reduction of mortality on the road (Accidents of professional drivers, In Itinere and, in Mission). Promoted among its employees, at all levels and through adequate training and information, the sense of responsibility with the Environment (reduction of energy consumption, recycling ...), Quality (the value of a job well done ...) and, Health and Safety (proactive prevention, participation...).
3. **Meet the needs** of Integral Logistics and Transport of each client, providing the most appropriate solutions at home case (for example: adapting the vehicles, their lengths, heights and weights). Continuous renewal of its fleet of vehicles to a more advanced **EURO technology**, in order to reduce as far as possible emissions and consumption of resources (flue gases, consumption of diesel, etc.), prevent the generation of waste, ensure the recovery of the same (essentially its recycling whenever possible), preserve the consumption of natural resources and integrate the facilities into the landscape. Improve the environmental performance of the organization.
4. **Lead** a positive behavior of our suppliers and subcontractors to achieve an improvement in the quality of products or services, in the protection of the environment, health of our own and third-party workers and, as far as possible, encourage the improvement of their results.

THE MANAGEMENT will communicate the Policy to the personnel of the company in a way that is understood by all, as well as to suppliers or any other group or individual who may be involved or interested. And it will carry out a periodic review of it, and objectives are established for its continuous adaptation and thus guarantee the process of improvement of the Environmental Management System, Prevention of Occupational Risks and Quality. Likewise, it will observe that all the necessary means are available to ensure the application of the Policy in all areas. And it will demand from all the staff and collaborators, their cooperation for the adequate fulfillment of the same, actively participating with the person in charge of the **GIS**.
